The purpose of this Medication Log Book is to serve as a record of each and every medication from given to the horse from the FEI Prohibited Substance List. The Log Book will enable the FEI to have a check of what is administered to the horse if ever required. This information may also be required by the FEI in the case of an alleged violation of FEI Rules.

This record must remain with either the FEI Passport/Recognition card, or the National passport during each FEI event. Each medication administered must therefore be entered in the Log Book without delay.

FEI Veterinary Department

Date	Place	Active substance in treatment and dosage	Person responsible	Treating Vet (where applicable)

Date	Place	Active substance in treatment and dosage	Person responsible	Treating Vet (where applicable)

Medication record, Treatment record

This information is compulsory for horses which have been administered medication both in and out of competition. It is particularly important to keep clear records of any treatment which includes an active substance that is currently on the FEI Prohibited Substances List. For further information on this List, please consult www.fei.org / http://www.feicleansport.org/prohibited.html
